Laptop security lock

Team concept project

Engineering problem and work

Developed a five-part mechanical theft-deterrence concept for use in public spaces, with SolidWorks models, assembly drawings, product requirements and project planning.

Process

User problem → mechanism → drawings → presentation

Tools

SolidWorks · Drawings · Mechanism design

Scope and status

No validated theft-resistance claim

Portfolio case-study brief based on coursework and user-provided descriptions. This is NOT a copy of the original laboratory report. Diagrams on the website are explanatory illustrations, not photographs or original experimental plots.
